

Vector Software announces version 4.0 release.

North Kingstown, RI – May 15, 2006 – Vector Software, the leading provider of software test tools for embedded systems, today announced the release of VectorCAST version 4.0

Version 4.0 highlights

- **Integration Testing** - VectorCAST 4.0 supports integration testing. This means that you can effectively test an entire sub-system, or application, using the same techniques that you use for unit testing. All existing tool functionality is supported for integration testing, including point-and-click test case editing, automated regression testing, and code coverage analysis.
- **Common GUI for VectorCAST/C, VectorCAST/Ada and VectorCAST/Cover** - It is now possible to create, or open, any type of VectorCAST project from the same GUI, this allows you to easily switch between Integration, Unit test, and Coverage projects.
- **HTML Reports** - All reports are generated in HTML by default, with user control over report layout and coloring.

Customers who are interested in browsing through the release notes, or down-loading the production release should contact their sales person, please email to sales@vectorcast.com

All existing customers with a current maintenance contract will be sent keys for version 4.0 automatically.

About Vector Software

Vector Software, Inc. is a leading independent provider of automated test tools for software developers. Established in 1989 as a consulting and service organization, Vector's product focus is to empower software professionals to deliver the highest quality software in the least amount of time. Vector's "VectorCAST" line of products, reduce the burden placed on individual developers by automating and standardizing application component level testing. This innovative technology developed by Vector represents the "next generation" of intelligent embedded software test tools. The tools support Ada83/95, C/C++ and Embedded C++ (EC++). The market focus of Vector is on companies performing embedded systems development for aerospace, military, medical, telecom, and process control related projects.
